NEW NAME! NEW WEBSITE! NEW ON-LINE TRAINING!

NEW NAME!

NVT SYSTEMS was formally known as Neuro Vision Technology. Our new name and logo allows for the growth of the company and a clean bright image. The name change better describes the product which is a holistic methodology and process of providing Vision Therapy for patients/clients with Neurological Vision Deficits. The methodology concentrates on functional assessment, therapy strategies using the NVT Scanning Device as a tool and transfer of skills to activities of daily living and dynamic mobility. The name change allows for the development of new products in related fields of vision assessment and training.

NEW WEBSITE!

NVT SYSTEMS has a new website. View our website on:- www.nvtsystems.com.au

Our new website has a clean fresh look and includes the latest informative brochures and media releases. View a video which provides an overview of the NVT Vision Rehabilitation System and see links to related agencies. View the link to Visibility, Scotland and the 2009 Military & Civilian Health Partnership Award for high recognition of the Sealladh Pilot Project that used a combination of the NVT System and rehabilitation to help veterans who experienced sight loss through brain injury. Click to view the full Evaluation report on the Sealladh Project which provides information on positive outcomes from the therapists, patient and carers points of view.

View information on the training programmes which have been provided to Veterans Affairs at two of their four Polytrauma units in Palo Alto and Tampa and at the Western Blind Rehabilitation Center (WBRC) in Palo Alto. NVT have trained 13 VA therapy staff which includes Blind Rehabilitation Officers, Low Vision Specialists, Orientation & Mobility Instructors, Occupational Therapists and an Optometrist. Western Blind Rehabilitation Center recently received an “**exemplary conformance**” in **CARF** standards for their Comprehensive Neurological Vision Rehabilitation (CNVR) program which includes the use of the NVT system.

NEW ONLINE TRAINING!

NVT SYSTEMS have developed an online theory course for all professionals working in the area of Brain Injury or Vision Rehabilitation and who are seeking additional knowledge and understanding of brain function in relation to the visual system and visual processing.

This course looks at vision from the perspective of the brain, not the eyes, using a simple structured approach. Accreditation is currently being sort through the Academy for Certification of Vision Rehabilitation & Education Professionals (ACVREP). See the information brochure on the NVT Systems website which outlines the course content and allows for enrollment for the course. This course has been developed by clinicians for clinicians.
